

Oak Class Homework

Literacy

We have been looking at newspaper articles. Show me that you understand how they are laid out and the style that they are written in (maybe you can write one about the snow!).

Numeracy

Show me that you understand how to multiply:

- a) Large numbers that are multiples of 10.
- b) HTU x TU (3 digit numbers by 2 digit numbers).

Science

Show me that you understand the difference between something that is soluble, and something that is insoluble.

The member of the class who brings in the most interesting and detailed homework wins a prize! 😊
